- No other experts were consulted/involved in this valuation engagement.

Valuation Currency: INR (Indian Rupees)

Valuation Approach and Methodology:

- **Valuation Approaches**

The following are the three main valuation approaches commonly used in valuation:

1. Income Approach
2. Cost Approach
3. Market Approach

- o **Income Approach:**

- The Income Approach provides an indication of value by converting future cash flow to a single present value. The criteria for choosing Income Approach, among others, are as below:
 - i. Income producing ability of the asset is the critical element in determining the value of the asset
 - ii. Where the asset is an income producing, future cash flows are available
 - iii. Such Cash flows can reasonably be projected
 - iv. The asset does not have any market comparable or comparable transactions

Since the operations of TSML are discontinued and the Assets are sold, Income Approach cannot be used for determining the fair value of equity shares providing exit option to the shareholders, as it does not fulfill the above-mentioned criteria.

o **Market Approach:**

- The Market Approach provides an indication of (Fair) Value by comparing the asset with identical or comparable (that is similar or substantially similar or same) assets for which price information is available and can be trusted for its reliability.

The shares of TSML are not listed in any of the Stock exchange and traded frequently and market price not determinable.

Further, Valuation are not conducted based on Comparable Methods, for reasons articulated as below:

- Comparable Transactions Method: No reliable information is available on transactions involving assets that are the same or similar to the subject asset to arrive at an indication of value.
- Guideline publicly-traded comparable method: No reliable information available on publicly-traded comparable for same or similar to the subject asset to arrive at an indication of value.

o **Cost Approach:**

- The Cost Approach provides for indication of value of the business is based on value of assets net of liabilities. This approach is used in scenario where it is easy to replicate or reproduce the asset and there are no major intangibles or brand value associated with it. It is also used in scenario where asset being valued is subject to Liquidation.
- The purpose of valuation is to arrive at the Fair Share Value for providing an exit opportunity to its Equity Shareholders.
- Considering the cessation of operations of the company and the need to determine the fair value of the shares to be used to provide an exit option to its equity shareholders (i.e., owners), Cost Approach (i.e., Net of Asset over Liabilities) would be appropriate valuation methodology. The Management have confirmed the Going Concern Status of the Company.
- Hence, I have conducted the valuation exercise based on Cost Approach.

Investigations and/or Inspections Undertaken:

The following are the inspections undertaken by me as part of the valuation exercise:

- Verification of Company's Master Data in MCA Site
- Verification of Secretarial Records in connection with Capital Structure and Shareholding Pattern

Major factors that were taken into account during the valuation:

The following are the major factors taken into account by me during the valuation exercise in arriving at the Fair Value of Equity Shares:

- Corporate actions taken or proposed to be taken for providing an exit option to its shareholders
- Cessation of Business Operations (of the Company) as confirmed by the Management
- Audited Financials as on the Valuation Date – basis of determining the fair value of the shares

Conclusion/ Recommendation:

The Management of the Company has confirmed to me that

- The Company in compliance with all the laws applicable to it in its local and national jurisdiction.
- The Company has confirmed that they have no contingent liabilities, unusual contractual obligations or significant commitments other than those arising in the normal course of business, including any pending litigations, if any.

On the basis of the matters, methodologies, description of methods and the basis of valuation mentioned here in above, the fair value of the fully paid up equity shares of the Company stands at Rs. 10.00 (Rupees Ten Only) Per Share as on the valuation date.

Disclosure of Valuer Interest/Conflict, if any:

- I am not associated with the Company in any other professional capacity and there are no sources of conflict and material interests involved.
- Neither the valuer nor the members of the team working on the independent valuation have directly or indirectly, through the client or otherwise, shared any

advisory perspective or have been influenced or undertaken advocating a management position in determining the value.
